Summary & Description

Solar Provider Group IL LLC and its Parent Company Solar Provider Group LLC proposed to construct a 5 MW AC community solar power generating plant on the parcels numbered 17-12-11-400-002-04 and 15-12-14-200-002-00 in Christian County, Illinois (See Figure 1). The name of the project is Fork River Community Solar. The proposed area of the project is approximately 21 acres.

This submission is supplemental to the original Special Use Application for Fork River Community Solar previously submitted to Christian County. An application for a Special Use Permit (SUP) for Fork River Community Solar was submitted to Christian County on March 3rd, 2023. Christian County Zoning Board of Appeals (ZBA) held a public hearing for the SUP Application on March 28th, 2023. The Christian County ZBA voted a motion to recommend that Christian County Board approve the application. An updated application with revised site plans was submitted to Christian County on April 14th, 2023. The SUP Application was approved by the Christian County Board on April 18th, 2023 as resolution O2023 ZB 017.

Site Plan Changes

The purpose of this submission by Solar Provider Group to Christian County is due to changes in the required access to the project. Topographical constraints in between Solar Array 1 and Solar Array 2 have meant that it would be too impactful on the environment and costly to gain access to Array 2 which would have required a road with a thick base, grading and culvert. To avoid this scenario SPG came to an agreement with the neighboring landowner to the South of the project to gain access to Array 2 from the South through their property. This new access option avoids the need to clear as much woodland and uses an already existing access point. This access option requires less grading and materials and will lead to less disturbance of the local environment, reducing any risk to wildlife, which was already low. See Schedule A to view the updated site plans.

The footprint of the project itself has not been changed from the proposal that was approved on the 18th of April 2023. The point of interconnection to the grid will remain to the Northeast of the project. The vegetative screening has not been altered from previous site plans. The setback from the property to the Northeast has been maintained and equipment has been kept as far from the property as practicable. An overhead cable will connect the two solar arrays across the stream avoiding any disturbance of the stream. SPG have reached out to both the Taylorville Township Road Commissioner and the Illinois Department of Transportation, and no issues have been raised. Any permits or agreements required will be agreed to by SPG.

The additional access road to the South of the project area will be very similar to the already proposed access road to the North. The road will more than likely consist of a gravel base which will be 15 feet in width and approximately 600 feet in length. The access road enters onto IL-104 approximately 0.8 miles Southeast of the Village of Kincaid. For further details see Schedule A.
